FUNCTIONS 1/2

DISPLAY TYPE	Green LCD no backlight
DISPLAY	Input in real value or programmed value Outputs in programmed value or percentage Relays state
DISPLAY SETTING	Automatic display resolution setting according to temperature value
INPUT SCALE FACTOR	Allows providing a magnifying effect on input in manual or automatic calibration
OUTPUT SCALE FACTOR	Allows providing a magnifying effect on output and on display
PROGRAMMATION	Programmation on front face with joystick 5 positions
MINI / MAXI MEMORY	Maximum and minimum measured values memorization
MEMORISATION	Memorization possibility of last measured value in case of sensor brake
OFFSET	Input Offset setting on all inputs type

FUNCTIONS 2/2

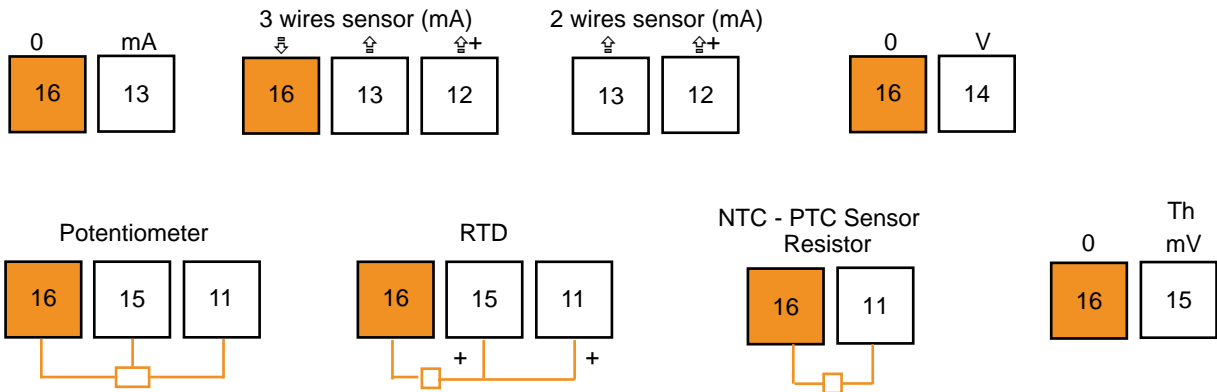

TARE	Tare setting process input
SIMULATION	Simulation function allows action concerning analogue output, relays and display separately from input and without disconnecting input or outputs
OUTPUT LIMITS	Allows outputs limitation values – High and low limits
CJC	Cold Junction Compensation with 16Bits digital sensor
SENSOR SAFETY	Shows sensor break on display, on relay outputs, on analogue output (by entering drop out value)
100 POINTS LINEARIZATION	Linearization allows creating an output function by input signal segmentation
RESISTIVE PTC - NTC LINEARIZATION	Allows to create the curve PTC or NTC by segmentation of the input signal (only by software IXLOG ULCOS via ULCOS 100)
SEUILS	Simple mode or band-mode with positive or negative safety. Threshold, hysteresis and temporization adjustment (separately from rise or fall). Direct access to thresholds setting. Alarm memorizing and alarm deleting
ALARMS RESET	Separately on each alarm
ALARMS MEMORISATION	Separately on each alarm
OTHER FUNCTIONS	Cut Off - Resolution 1 or 10 digits - Comma - Filtering - Joystick locking Contrast display setting
