GV204

Impulse Splitter for Incremental Encoders

Product features:

- Programmable encoder input A, /A, B, /B, Z, /Z, for use with RS422 or TTL differential signals or with HTL signals (differential or single-ended)
- Two encoder outputs (A, /A, B, /B, Z, /Z each) with individually programmable output levels (TTL 5 V or HTL 10 to 30 V)
- Max. frequency 750 kHz (TTL) or 300 kHz (HTL)
- Power supply either 5 VDC or 10 to 30 VDC
- Aux. voltage output +5 V for encoder supply (with 10 to 30 VDC power supply)
