

# “Clean profile” cylinders to ISO 15552 standard Ø 32 ÷ 100

# series X

1

## DESCRIPTION

Cylinders series “X”, and their fixing accessories, comply with ISO 15552 standard, being in this way completely interchangeable with the former cylinders to ISO 6431/VDMA 24562 standard. They are available in the bores from Ø 32 to Ø 100 with techno-polymer piston as standard. The cylinder barrel, made in extruded aluminium alloy, has some “T”-slots on three sides where it’s possible to mount directly the magnetic sensors series “FM100”. Upon request, cylinders series “X” comply with ATEX directive, 2GD category. Thanks to proper cover strips that give the cylinders a really clean profile, the cylinders result suitable also for difficult environments like the food one. A further feature is the possibility to assemble some series of valves directly on the cylinder barrel thanks to the brackets type “X/P/M” (see page 1.24).
