

# Measurement and Sensor Systems with conception

Precision Rotary Potentiometer

# Precision Rotary Potentiometer

with resistance, current or voltage output

Today potentiometric angular position transmitters attain a still more status with regard to the analogue measuring technique as far as high-quality measurement tasks are concerned due to the favourable value for money.

They are mainly used for

- **Power braking control elements for railway vehicles as well as ship telegraphs**
- **Rudder and propeller systems for ships**
- **Control drives for systems in the field of energy management and chemical industry**
- **Lifting gears and slewing mechanisms of cranes and excavators**
- **Tail vanes for meteorological measurements**
- **As dancer potentiometers for textile and paper machinery**
- **As well as for measurements in the field of mechanical, apparatus and medical engineering**

Potentiometric transmitters have either a high-resolution element of conductive plastic or high-resolution gold or constantan wire with various resistance and angle values.

They are available in various sizes as single-turn or multiple-turn potentiometers or in a multiple design.

For adjustment of the measuring range almost all series can be provided with shorted sections, tappings and function windings.

Some models are available with incorporated signal converter providing current or voltage outputs in configuration of 2, 3 or 4 wires.

To ensure reliability in very dirty atmospheres, oil-filled potentiometers are available.

Moreover, to provide protection for all potentiometers from mechanical damage, dusty and damp industrial atmospheres a series of housings with a protection of the types IP 40 to IP 68 is available; partly to be equipped with gearing and limit switches.

## Application ranges

# Versions and circuit variations

## Series PW

Resistance elements as **ring winding** with wire winding on an anodised aluminium anchor ring can be provided with any circuit, angle and resistance values.

1. Wiper limited by stops
2. Wiper continuous rotation over 360° with reactive winding
3. Wiper continuous rotation over 360° without reactive winding (sawtooth shape)
4. Any arrangement of shorted sections
5. Any arrangement of tappings
6. 7. 8. Special windings with characteristic curve of the linear or sin/cos type
9. Two electrically isolated windings on a winding former, angle  $\leq 175^\circ$

## Series PW

Resistance elements as **straight winding** with wire winding on a coated former of copper wire are used in potentiometers of the multiple-turn or linear type but also in single-turn potentiometers with active angles up to max. 350°.

1. Wiper limited by stops
2. Wiper continuous rotation over 360° only for purposes of putting into operation
4. Any arrangement of shorted sections
5. Any arrangement of tappings

## Series PK

Resistance elements of **conductive plastic**, imprinted on glass-fiber reinforced supports. The max. active angle amounts to 355°. Smaller angles, tappings and shorted sections on request.

1. Wiper limited by stops
2. Wiper continuous rotation over 360°
4. Any arrangement of shorted sections
5. Any arrangement of tappings
7. Sin/cos characteristic curve
9. Two electrically isolated windings on a winding former, angle  $\leq 175^\circ$

# Angular Position Transducers

**Angular position transducers**, equipped with resistance elements of wire or plastic resistance elements with integrated R/I or R/V converter for current or voltage output, optional with a configuration of 2, 3 or 4 wires.

Also available with galvanic isolation between supply and output signal as far as version with 4 wires is concerned.

All types of transducers are provided with rear trimmer to match output signal within wide ranges to the respective angular deflection.

## Electrical specifications

Type series	PW / PK 613-MU	PW / PK 620-MU	PW / PK 1023-MU
Voltage output	–	0 - 10 and 2 - 10 V respectively	
Load resistance	≥ 2 kΩ		
Current voltage	0 - 20 and 4 - 20 mA respectively		
Load resistance	≤ 600 Ω		
Supply voltage	18 - 33 V DC		
Current consumption	approx. 80 mA		
4-wire system galvanically isolated	–	✓	✓
2-, 3- or 4-wire system	✓	✓	✓
TC	max. 1 % / 10 K; typically: 0,5 % / 10 K		
Linearity	± 0,2 %	± 0,1 %	± 0,1 %

Zero point and rise to be adjusted via trimmer

# Specifications of protective housings

**Series A**

Mechanical data	
Housing	alu, grey coated
IP code	IP 40 or IP 65
Shaft	stainless steel
Bearing friction	0,8 Ncm
Weight	ca. 0,4 ... 1 kg
Article number	1708Z03

**Housing suitable for accommodation of any potentiometer of type series PW70 in single design.**

**Series G 90**

Mechanical data	
Housing	alu, grey coated
IP Code	IP 40 or IP 65
Shaft	stainless steel
Bearing	2 ball bearings
Bearing friction	IP 40 = 0,1 Ncm IP 65 = 1,5 Ncm
Gearing	1:1 up to 1:10 * 1:1 up to 25:1 * 26:1 up to 125:1 **
Weight	approx. 1 kg
Article number	3601Z02

**Housing suitable for accommodation of any transmitter size up to 54 mm outside diameter.**

\* free from backlash, \*\* low backlash

**Series GS 120**

Mechanical data	
Housing	alu, grey coated
IP Code	IP 65
Shaft	stainless steel
Bearing	2 ball bearings
Bearing friction	1,5 Ncm
Gearing	1:1 up to 216:1 * 1:1 up to 1296:1 ** 1:1 up to 1:10 ***
Weight	ca. 2,5 kg
Article number	1892Z

**Housing suitable for accommodation of any transmitter size up to 70 mm outside diameter.**

\* free from backlash, \*\* low backlash

\*\*\* free from backlash or low backlash
